

As a follow-up to the H1N1 email blast sent yesterday, we would like to clarify some of the information parents are receiving regarding the H1N1 vaccinations. In October 2009 we were informed by the Middlesex County Public Board of Health that we would receive vaccinations for students within Spotswood schools only. On October 13, 2009 an interest survey was sent out asking parents if they were interested in receiving the vaccination for their child(ren). The number of parents who expressed an interest was given to the Board of Health. We have recently received a small amount of vaccines to accommodate those who responded to the survey. Therefore, Monday, November 9, 2009 only those Spotswood students will receive the vaccine. A second round of vaccines will be offered sometime in the very near future, however at this time the Board of Health has not given us a date or an amount we may be receiving. We will keep you informed of any further information as we receive it.

Respectfully,
Dr. Walter Uszenski
Superintendent of Schools
